

High Performance Email Archiving Meets Compliance Requirements, Reduces Litigation and IT Operational Costs

The Message Logic MLArchiver Appliance simplifies email archiving with advanced searching and analytics to speed up investigations, reduce litigation discovery costs, manage policy risks, and cut IT operational expenses

In addition to accurately copying, indexing, and storing your critical electronic messages, Message Logic is optimized to reduce searching and retrieval time, which translates to lower costs. We accomplish this in several ways:

Our exclusive Analytic technology can produce results in seconds for more than 80 of the most frequently searched items, including senders, recipients, social security numbers, confidential data, medical content, and offensive language.

Message Logic's state-of-the-art searching technology enables you to find exactly what you need without wasting time.

All messages are indexed in real-time and are immediately ready for searching. Capabilities include powerful exact, phrase, fuzzy and proximity searches with compound Boolean expressions

The Message Logic technology is integrated with high performance server technology using the latest Intel® processors to provide exceptional archiving and retrieval capabilities.

The Message Logic MLArchiver Appliance is a fully integrated solution that includes compliance, litigation hold, and policy management features in a single, easy-to-use, browser-based interface. It arrives fully configured at your facility and typically takes less than an hour to install.

A full year of MLPro Support is included.

FEATURES

Message Logic offers three powerful archiving solutions. The **MLArchiver** is a hardware appliance which includes all of the storage and processing power needed to meet your archiving requirement. Systems are designed with redundancy, more storage capacity and processing power than our competitors.

MLArchiverVM is the only VMwareReady solution for email archiving. We have gone through rigorous testing and procedures with VMware to deliver an application which runs seamlessly in your VMware ESX or ESXi environment. This unique application brings all of the benefits of virtualization. If you are a service provider, telco or enterprise deploying VBlock we also offer special programs to support your needs.

MLArchiverCloud is our technology available as a fully managed service.

ARCHIVED MESSAGE TYPES

- Archives multiple servers and message types simultaneously
- Microsoft Exchange, IBM Lotus Domino, Zimbra, Kerio, UNIX POP3, and more
- Bloomberg, AIM, Yahoo IM, Google Talk, ICQ, IBM Lotus Sametime, Windows LiveMessenger, and more*

ARCHIVE CAPABILITIES

- Reliable "never miss a message," low overhead, journal based copies
- Message compression
- Single instance message storage
- Time-based retention schedule

SEARCH CAPABILITIES

- Pre-Search advanced language technology speeds retrieval of the 50+ items searched most often,
 - e.g., senders, recipients, social security numbers, confidential information, and offensive content
- Full text index of the entire message, including body, headers, metatext, and attachments
- Search text in any attachment, including Microsoft Office, PDF, ZIP files, and more
- Search key words and phrases using:
 - Exact match
 - Single or multiple character wildcards
 - Boolean expressions
 - Proximity search (within x words)
 - Fuzzy search (similar spelling)
 - Complex, multi-step search
- Saved searches: Run a search once and set it to run again at defined intervals

LITIGATION SUPPORT

- Fully integrated litigation hold
- Message tagging and reviewer notes
- Export in industry standard format for use by case management software
- Audit trail

COMPLIANCE AND REAL-TIME ALERTS

- Policy based, real-time monitoring
- Automated warnings to sender, recipient or management for policy violations
- Random sampling and review
- Pre-defined policy categories (50+)
- Customer defined policy categories for watch list, key word, domain, and more
- Message supervision in compliance with SEC and FINRA requirement

DATA PROTECTIONS (Appliance)

- On-board mirrored (RAID 5) storage
- Automated second copy to existing network backup
- Unlimited expansion via SAN or iSCSI
- Optional off-line copy at secure hosted storage facility or alternate location
- Dual power supplies (most models)

EMPLOYEE ARCHIVE ACCESS

- Outlook Plug-in with full search capabilities
 - Find, retrieve and manage any archived message from Outlook
- Web Based tool for access to messages
- Reduce mailbox sizes for employees
- Provide a simply way for employees to locate and retrieved archived messages

SUPPORT

- MLPro Support for fast software and hardware updates and maintenance
- MLPro Monitoring remotely diagnoses and solves problems
- Message Logic pre-configures all systems to reduce installation times to under 30 minutes

COMPLIES WITH THESE AND MORE REGULATIONS

- Securities Exchange Commission (SEC)
 - Books and Records, 17(a)4
- FINRA
- Freedom of Information Act (FOIA)
- Federal Rules of Civil Procedure (FRCP)
- Legal Early Case Assessment (ECA)
- PCI Compliance (Personal, Confidential Information)
- Patriot Act
- Sarbanes Oxley (SOX)
- Federal Drug Administration FDA 21 CFR Part 11
- Department of Defense (DOD)
- HIPAA (Healthcare, Information, Portability & Accountability Act)
- Dodd-Frank

VMWARE READY FEATURES

- Downloadable Media
- OVF Format
- Works with any Virtual environment including ESX and ESXi
- Unlimited scalability of storage, processing power and more
- Reduced datacenter footprint and all of the benefits of virtualization

MLArchiver Appliance Models

Model	AA-5010	AA-5030	AA-5050	AA-5100	AA-5250	AA-5500	AA-5900
Recommended number of users	100	300	500	1000	2,500	5,000	10,000
Storage Capacity after RAID 5	1TB	2TB	3TB	4TB	6TB	10TB	20TB
